

Amendments to the Specification:

Please amend the specification on page 17, lines 3-9 as follows

Two different oligonucleotides carrying a pyrrole group at 5' are copolymerised on these carriers. ~~Their sequences are as follows:~~

~~pyrM5 : ——— 5' pyr (T)₁₀ GGAGCTGCTGGCGT 3'~~

~~pyrCP : ——— 5' pyr (T)₁₀ GCCTTGACGATACAGC 3'~~

They were synthesized using the method described by Livache *et al* in [5].
